

1. TEMPERATURE SENSORS

GuardMagic DTS2/12V (Indoor and Outdoor Application) 1-wire communication interface.

Digital temperature sensor for vehicle and stationary application for air temperature measurement.

“Active power”, that allow to locate sensor in distance up to 30... 100 meters from main unit.

- Power 12V DC;
- Measuring temperature: -40 ... +80 Celsius;
- Accuracy of temperature measuring: +/-0,5 (-10 ...+80);
- Communication interface: 1-wire;
- Serial code: 64 bits;
- Operation condition: Indoor and outdoor (water and dust resistance);

GuardMagic DTS2/24V (Indoor and Outdoor Application) 1-wire communication interface.

Digital temperature sensor for vehicle and stationary application for air temperature measurement.

“Active power”, that allow to locate sensor in distance up to 30... 100 meters from main unit.

- Power 24V DC;
- Measuring temperature: -40 ... +80 Celsius;
- Accuracy of temperature measuring: +/-0,5 (-10 ...+80);
- Communication interface: 1-wire;
- Serial code: 64 bits;
- Operation condition: Indoor and outdoor (water and dust resistance);

2. FUEL LEVEL SENSOR
